Lorework

HOW KNOW-HOW TRAVELS

Where does your team’s know-how live?

Four stages, from one person’s head to a process that runs every time.

1 · IN SOMEONE'S HEAD

It works beautifully.

Right up until that person is on holiday, off sick, or moves on.

2 · IN A DOC

A doc nobody reads.

Documents help, but they don’t do the work. Someone still has to read them, interpret them, and remember the exceptions.

3 · TAUGHT ONCE

Taught once, runs every time.

Your team teaches an AI coworker the process step by step. It runs it the same way each time, over chat and SMS, and shows where its answers came from.

4 · HANDED OFF

Hands off to a person when it should.

When a case falls outside what it’s been taught, it hands off instead of guessing. The judgement calls stay with people.
